Education

Shahjalal University of Science and Technology
B.Sc. in Software Engineering CGPA: 3.52 / 4.00

Sylhet, Bangladesh
Mar 2022 - May 2026

Research Experience

HiveMind Research Group

Research Contributor

Remote

Jan 2026 - Present

Paper: *AgentCollabBench: Diagnosing When Good Agents Make Bad Collaborators*

FAGEN, ICML 2026

Resources: [arXiv Preprint](#) | [GitHub](#) | [HuggingFace Dataset](#)

Under Review (NeurIPS 2026)

- Contributed to *AgentCollabBench*, a benchmark for evaluating collaboration failures and reliability in multi-agent LLM systems.
- Assisted with dataset design, benchmark construction, and evaluation setup for Software Engineering, DevOps, and Data Engineering tasks.
- Participated in experiment design, dataset validation, and research discussions within a distributed AI research team.

Undergraduate Thesis

Commit Message Generation using LLMs with Issue-Based Context

May 2025 – Nov 2025

Under Review (Q4)

- **Co-First & Corresponding Author:** Led experimental design, benchmark curation, human evaluation pipeline, and paper manuscript.
- Evaluated GPT-4 Turbo, Claude 3.5, and Gemini 1.5 Pro on 309 issue-linked commits from real-world open-source repositories. [\[HuggingFace Dataset\]](#)
- Developed a dual evaluation framework combining automated NLP metrics and double-blind assessment by 30 software developers.
- Improved commit message quality by 42–53% over human-written baselines through prompt engineering.

Advanced Machine Intelligence Research Lab, AIUB

Intern Research Assistant

Remote

Feb 2026 - Jun 2026

- Contributing to research on federated unlearning for LoRA-tuned LLMs, focusing on privacy-preserving machine learning and machine unlearning.
- Assisting with literature review, experimental design, and evaluation for federated learning and parameter-efficient fine-tuning methods.
- Supporting an ongoing computer vision project on diffusion-based restoration of snow-degraded images.

Industry Experience

ShellBeeHaken Ltd.

Intern Software Engineer (Onsite)

Dhaka, Bangladesh

Dec 2025 - May 2026

- Contributed to **production UI components** and navigation flows using **React Native (Expo)** and **Next.js**, integrating **REST APIs** and managing application state across screens.
- Assisted in building **event-driven backend services** with **AWS Lambda**; gained hands-on exposure to distributed systems concepts including **data replication** and **load balancing** during architecture discussions.
- Participated in the full **API development cycle** from writing data contracts to **integration testing**, while working in an **Agile** team with sprint planning and code reviews.

Competitive Programming

- Solved **1100+** programming problems across [LeetCode](#), [Vjudge](#), and Codeforces with a focus on algorithms, data structures, and problem-solving.
- Maintained a **433-day** LeetCode streak, earned **23** badges, and achieved a peak rating of **1622**.

Projects

Personality Detection Using Machine Learning

[GitHub](#) | [Live](#)

- Improved model **F1 score by 20%** via advanced **feature engineering** and **hyperparameter tuning**, achieving **91% accuracy** in real-time personality prediction.
- Tools: Python, scikit-learn, Flask, Next.js, Pandas, NumPy, joblib.

Local Household Service Provider Platform

[GitHub](#) | [Live](#)

- Designed an **optimized data-fetching architecture** that reduced retrieval time by **60%**, resulting in **20% higher** overall application responsiveness and user satisfaction.
- Integrated **Google Gemini-powered AI chatbot**, improving service query response rate by **60%**; authored critical system documents including SRS and project proposal.
- Tools: Next.js, Express.js, MongoDB, Nodemailer, Cloudinary.

Real-Time Multi-Module Chat Application

[GitHub](#)

- Built a **real-time desktop chat system** using **Java, Socket.IO (Netty), PostgreSQL, and Swing**, structured with a **multi-module Maven architecture** and shared DTOs for consistent client-server communication.
- Implemented **WebSocket-based messaging** with a custom **reconnection strategy (exponential backoff)** and heartbeat monitoring to ensure resilient real-time connectivity.
- Designed an **event-driven backend architecture** supporting authentication, messaging, and file transfer workflows, with secure and efficient persistence using **HikariCP, PostgreSQL indexing, and BCrypt authentication**.

Technical Skills

Languages	JavaScript, Java, C++, Python, TypeScript
Frontend	Next.js, React, React Native, Flutter
Backend	Node.js, Express.js, RESTful APIs, GraphQL, Socket.IO
Databases	MongoDB, Firebase, MySQL, PostgreSQL
Tools	AWS, Docker, Git, Linux, Serverless (AWS Lambda), Postman, Maven

Academic Honors & Certifications

- **2nd Runner-up** - "Bridging Engineering & Computer Science" International Hackathon, organized by ILM-AI, co-hosted by **St. George's, University of London**. Built a browser-based projectile motion simulator with optional air resistance (two-member team). [GitHub](#) | [Live](#)
- **Certifications:** AWS Cloud Practitioner · AWS Lambda · AWS DynamoDB · AWS API Gateway · Claude Code in Action (Anthropic) · Generative AI (Udacity & AWS) · ML Crash Course (Google).
